## DIGITAL DESIGN

In Digital Design, students work on professional design software offered by the Adobe Creative Suite. Students work towards industry certification in Photoshop, InDesign and Illustrator. In this project-based class, students learn typography, graphic design principles, and create digital portfolios which demonstrate increasing skill as they move through the curriculum.

Digital Design curriculum features:

- Digital Design 1-4 are honors-weighted courses
- Project-based, hands-on learning
- Industry certification in the Adobe Creative Suite including Photoshop, InDesign, and Illustrator
- Engaging Guest Speakers
- Unique Field Trips
- Summer Internship Opportunities

Students in Digital Design also have the option to add newspaper **Journalism** or **Yearbook** as an additional elective to complement their Digital Design course. This allows students to also learn print writing and photography skills.
